

Cheswick Christian Academy Wellness Policy

To all parents: The National School Lunch Program, which offers free and reduced priced lunches to those who qualify, requires that we have a wellness policy in effect to encourage healthy eating habits and physical activity. Cheswick Christian Academy's wellness policy first became effective July, 2007. During quarterly staff meetings, the wellness policy is reviewed and discussed. We welcome participation and suggestions from parents. Full copies may be obtained by calling the school office or can be found on our website.

POLICY TO ENCOURAGE HEALTHY EATING HABITS AND PHYSICAL ACTIVITY **Effective July, 2007 - Revised October, 2017**

It is the intention of Cheswick Christian Academy to comply with all federal standards of the "No Child Left Behind" law. It shall apply to all students, staff, coaches, and volunteers and encompasses all food available to students during the school day through the food service program, in-school fundraisers, and classroom parties. The policy shall be enforced by administration, staff, and the food service director or coordinator and shall be reviewed quarterly.

1. PURPOSE AND GOALS

INTENT - The intent of this policy is for all students of Cheswick Christian Academy to possess the knowledge and skills necessary to make nutritious food choices and be encouraged to participate in a variety of physical activities. As role models, educators are encouraged to model a healthy lifestyle as a valuable part of daily life. The comprehensive plan to encourage students to establish and maintain lifelong nutritious eating patterns and a healthy lifestyle includes:

- A food service program that serves appealing choices of nutritious foods and a clean environment in which students are given an adequate time to eat.
- Available healthy a la carte choices.
- Nutrition and healthy lifestyle education to all grades.
- A physical education program that includes moderate to vigorous activity.
- Time in the elementary school day for supervised recess.
- Opportunities for students to participate in extracurricular activities.

RATIONALE - The link between nutrition and learning is well documented. Healthy eating patterns are essential for students to achieve their full potential, physical and mental growth, and lifelong health and well being. Healthy eating patterns are linked to the reduced risk of many chronic diseases as adults. Regular physical exercise reduces the risk of heart disease, high blood pressure, colon cancer, and diabetes. Promoting physical activity among young people is important because...

- Through its effects on mental health, physical activity can increase a students' capacity for learning
- Physical activity has health benefits for students
